

# JavaScript Test - Local Storage, Session Storage & Cookies

**Topics Covered:** Local Storage, Session Storage, Cookies

**Difficulty:** Easy to Medium

**Total Tasks:** 5

## Task 1 – Save Name in Local Storage (Easy)

**HTML**

```
<input type='text' id='name' placeholder='Enter your name'>
<button id='saveBtn'>Save Name</button>
```

**Task:** Store the input value in Local Storage using the key **username** when the button is clicked.

**Hint:** `localStorage.setItem()`

## Task 2 – Display Name from Local Storage (Easy)

**HTML**

```
<h2 id='output'></h2>
<button id='showBtn'>Show Name</button>
```

**Task:** Retrieve **username** from Local Storage and display it inside the h2 element.

**Hint:** `localStorage.getItem()`

## Task 3 – Save Login Status in Session Storage (Easy-Medium)

**HTML**

```
<button id='loginBtn'>Login</button>
<p id='status'>Not Logged In</p>
```

**Task:** Store **true** in Session Storage with the key **isLoggedIn** and update the text to **Logged In**.

**Hint:** `sessionStorage.setItem()`

## Task 4 – Create a Cookie (Medium)

**HTML**

```
<button id='cookieBtn'>Create Cookie</button>
```

**Task:** Create a cookie named **username=Payal** that expires after 1 day.

**Hint:** `document.cookie`

## Task 5 – Mini Challenge (Medium)

**HTML**

```
<input type='text' id='theme' placeholder='Enter Theme'>
<button id='saveTheme'>Save Theme</button>
```

```
<button id='loadTheme'>Load Theme</button>
```

**Task:**

1. Save the entered theme in Local Storage using key **theme**.
2. Load the theme from Local Storage.
3. Display it using **alert()**.

## Instructions

- Use only Local Storage, Session Storage, and Cookies.
- Write clean JavaScript code.
- No external libraries.
- Test your code in the browser.
